

**Name:** Hobbe Eriksson

**Age:** 24

**Field of studies:** Human resources

Hello!

My name is Hobbe and I am originally from Stockholm, but I have lived in Lund for almost three years now. This is my fifth semester as a foreman and I have been an Electrified foreman, a novisch foreman and I am currently on my second semester in the election committee.

Since the first time I heard of Seniors it has been my goal to gather enough experience and knowledge to get elected. This is my last semester on my bachelor's degree and in the future I want to spend my time in Lund with full focus on our fantastic nation.

I want to keep up the work Seniors have started with using the foremen's input to develop our activities at the nation. I also want to contribute by being a contact senior and a member of the senior election committee. Considering that I have a foreman post right now I have a close contact with the rest of the foremen, which I think is an advantage in the work as a contact senior. In the election committee I can contribute with knowledge since I have studied and worked with recruitment.

Seniors have started examining the quaratel's work environment which is a project that I really would like to be a part of. Work environment is something that is close to my heart and it is also what I am interested in working with in the future. I have experience in the subject because of my studies, and last semester I worked at a company with auditing their work environment plan and helping them by updating their work environment policy and their equality policy.

With me in seniors you will get a member who has a lot of time to spend on the assignment. My main priority is to develop our activities with the help from the foremen and to work with the environment and the health of the people who are active at the nation.
