

Hello Sydsåkånska. My name is Hans, and I'm applying for seniors at this nation meeting.

A quick introduction about me is probably in order. I'm a 23 year old from Lund and have been studying biology since 2013. I have since I've started studying been active and engaged in different student organisations and have since 2014 been active at sydsåkånska. Within the nation my first post was as a chef, since food is a big interest of mine. After that I've also been at the kksmstar post, and in the election committee. Currently I am working for the science union for full time, which has given me a greater interest for working with the studentlund partnership, and for board meetings.

I am candidating for seniors because I want to help the nation move forward and develop further marking our spot within studentlund as a great nation. To the seniors post I will bring with me a lot of experience from my previous engagements as well as the current one. I will also bring with me the perspective of someone whom not to long ago was a forman since my last semester I was still a forman.

I also think my way of bringing many peoples oppinions into consideration will make me a good candidate for kontakt seniors, something I have great interest in.

I hope you all ask the questions I do not answer here during the meeting, and that you find me a good candidate.

Allt gott!
