

## **Presentation Henrik Berven**

My name is Henrik Berven, born in south of Skåne and I live in the small coastal village Abbekås on the southcoast of Skåne with my two kids. I have a degree in economy and political science from the University of Lund and I have worked with business administration and development questions in a lot of different branches and companies. For example Handelsbanken, Swedish trade council, Ericsson and Malmö Opera. Today I work with development questions in industry, growth questions in small and medium sized companies and coordination questions between the regional development authority and the municipality development departments in Skåne.

Besides adventure in snow and at sea, interior styling and renovation, traveling nearby and distant, I have a passion for food and what you serve to it and the hostesship. I cook with joy but love tasting.

At the Nation witch I moved to in 1991, I have worked as Pubförman, Qurator, Project manager for the overall renovating project in 1993. I also managed the fundraising project for the house and raised a donation of a million among others. I was one of the founders of the alumni organisation Piraten 1994 and chaired the organisation for more than 10 years.

My choice is not to apply for the position as Proinspector, I am merely offering my time and knowledge. I have had the opportunity and joy of following the Nation and its work since I left Lund and I think this continuity can be valuable. The house needs renovation and it would be inspiring to be part of leading this task as I did 25 years ago. I take a big interest in and have experience from preserving and develop property ever since. As a founder of the alumni organisation this is something I also would like to develop. But most of all, I would like to be a part of developing the greatest Nation in Lund to be ever greater to be able to give something back to an organisation that has meant a lot to me.

After 30 years of development work, prospecting, management and chairman work, I would like to think I have some experience that could be useful in the work of developing the Nation. I can also offer a network and contacts in various areas that can be valuable but most important, as a south scanian that cherish its Nation and a positive and valuable development resource for the future prosperity. I can also be of some help in coaching academics on their way to become professionals, this has always been a part of my job.
