

Hello everyone!

My name is Tilda Kurki and I am seeking the position of Novisch foreman, a position I got temporarily elected to in the beginning of this semester but am now hoping to officially be elected for at the upcoming nation meeting.

I have already been part of the team that put together the Novisch period for the spring semester of 2025 and I have now become very familiar with the work that is required of me as a Novisch Foreman. With a lot of the events being quite different from each other during this two-week period, I have heard many positive things about multiple events which is something that I aspire to bring to the next period as well. There should be something for everyone! Events such as the rave, the house-party-tour, pentathlon and classics such as our normal events with some extra pizzazz are things I want to incorporate into the next period as well, together with some new ideas and surprises of course!

During a stressful period such as the Novisch weeks there have been many ups and downs and I have learnt a lot. Through thorough communication, ambitious yet achievable plans, a lot of pre-planning and a positive attitude the period has gone quite smoothly. I'll take with me all the positive things while working on improving the more difficult things of the period as well. Despite some stressful moments, I have overall enjoyed this experience very much and have loved to bring such a fun Novisch period to the nation and I would love to do it again next semester!

This semester we also worked on expanding our collaborations with other neighbouring nations. This was a very positive experience and something I want to explore more during next semester as well. The feedback has been very positive and we have agreed on things that worked out well and also things to improve.

Apart from my recently acquired experience of being a Novisch foreman this semester, I have also been a Lunch foreman for a year where I learnt to work under stress as well as find creative solutions to sudden problems, something I have found to be very useful when planning and hosting the Novisch period. Similar to the work of a Novisch foreman, last semester I was also elected as Vieri foreman where I have found great joy in planning similar events as to those of the Novisch period where I try to make sure that there are varying activities that help us build a positive community.

To summarise, from my prior experience of not only having planned and executed a Novisch period already, but also my work as a vieri foreman and a lunch foreman I believe I would be a good asset to the Novisch team next semester. With fun ideas, more collaborative and varying events as well as a positive attitude I hope to make the next novisch period even better!
