

Name:

Max Pörscke

Age:

25

Studies:

Sociology

Who are you?

I have been an active member of SSK for a few years now. Last semester I decided to take a short break from holding a position but now I'm back. I think that distance has helped me a lot to view the nation in a fresh light and hopefully come back with some good ideas and a bit of a critical lens. I have been a student in Lund since 2020. I have studied urban planning and later sociology. I have yet to start my masters which means i will be here for quite a while yet.

What have you done at the nation?

I joined the nation HT23. I started of working clubs but quickly fell in love with our beautiful kitchen. I became a chef VT24. After that I was PQS during 2025. I have always had a love for democracy and the unique structure of the nation and I was very invested in the big statute change in 2024. During my time in the quarrel I got even more of an understanding of the work that goes on in the upper board as well as a good overview of how the nation works.

Why are you applying for seniors?

There are two main reasons I am applying for seniors. Number one is there are things I'd like to work with. Mainly looking over routines both within seniors itself and the nation as a whole. I would like to continue some work I started as a PQS and have the chance to evaluate some of the work with the hopes of improving it. This includes the work with M&S and Spendups.

The second reason is I want to support the quratel and not least my successor that is now on halftime.

What do you wish to achieve as a member of seniors?

Hopefully ensure we transition from our current alcohol contract into one that works long term for the nation. To ensure better working conditions for the quratel and foremen. Working in the nation should be fun and not taxing.

Why should the nation meeting elect you?

I have a good deal of experience in the nation and in the upper board. Perhaps most importantly I will do my absolute best to make sure things get done in seniors, something I worked very hard on as a PQS.
